

Sun Developer Network Program

To continue to learn about the latest technologies from Sun and keep ahead of your times we would like to invite you to join our Sun Developer Network Program.

Sun is committed to supporting you, with a full-fledged program that offers you valuable and practical resources, including an integrated, functional Web site that matches your needs.

Further to our quest of delivering the best tools, technologies and expertise for maximizing efficiency, we've created a robust developer program, called the Sun Developer Network Program, which we'll continually enhance.

Key benefits of this program include Technical Topics, Newsletters, Training, Events, Support, Software, Business and Career Tips

Yes, Register me!

Name : _____

Designation : _____

Organization/Institute/Company: _____

Contact Details : _____

Address : _____

Email: _____

Phone: _____ Fax : _____

Yes, I would like to have information about future sessions. Please keep me updated about SUN Event/Sun Developer News and Sun Technologies and Products.

Become a Open Solaris Community Member – In Your City

Also Sign me up for an Open Solaris Community

By joining the Open Solaris Community you would meet, greet, get help, give help, and join the extended community of developers using the Solaris operating system. You'll meet our engineering team and developers like you in the **forums**, find **live events** in your area, read **web logs** and get on-demand content like **podcasts**, **RSS Feed** and **videos**. You can also **contribute** an article or some code. We invite you to participate!

Get Record Setting Compilers and Tools For Free

Also sign me up for Solaris Express Developer edition (Including Sun Studio 11 software)

Solaris Express, Developer Edition is an Open Solaris-based distribution for x86 that includes the latest tools, technologies, and platforms to create applications for Solaris OS, Java Application Platform, and Web 2.0. Available at no-cost, Solaris Express, Developer Edition is regularly updated to incorporate new functionality to help application developers create better applications-- faster. Developers can create high performance applications using this distribution and deploy to Solaris 10 OS
