

Mr. Prasad Modali:

“**Prasad Modali** is a Principal Engineer at Intel India Bangalore office.

He has been with Intel since 1992. He is currently leading Intel India strategic initiatives identifying & extending Intel products to serve emerging market unmet needs. For the last 5 years, he led the mobile wireless silicon architecture group building WiMAX products. He led platform and silicon architecture development for the first three generations of WiMAX residential gateway products. Most recently, he led analysis of integrating wireless silicon into compute platforms. Prasad briefly left Intel, worked at a startup company and built silicon products to optimize network utilization for wide area networks. Previously, Prasad worked in the roles of lead architect, cluster design manager, and circuit design engineer on several successful Intel products including Network Processors, Itanium, Pentium® III, Xeon® and Pentium® Pro. Prasad holds 5 patents, has a Master’s in EE from Southern Illinois University and Bachelor’s in Electronics from VNIT, Nagpur”
